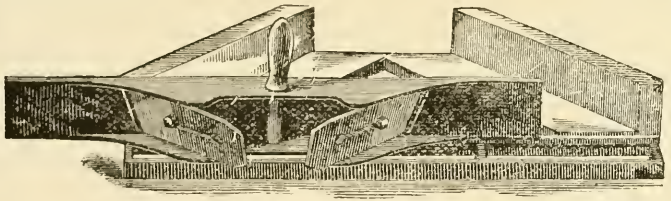
Improved Mitre Plane and Jack Board.



Adapted to mitreing ALL KINDS of Wood Work, but especially intended for Mitreing Picture Frames. It is simple in construction, easily adjusted and kept in order, and quick and reliable in its work. It has been thoroughly tested, and gives universal satisfaction, as numerous testimonials from parties now using it will show, saving at least fifty per cent in time of making a frame, and ensuring you PERFECT JOINTS when done.

All those who wish to make their Frames in a workmanlike manner, should not fail to secure one of these CHEAP and RELIABLE Machines.

The body of the plane is of iron and runs in grooves on an iron bed, so that it is impossible for it to be "crowded off" from the moulding, and make an imperfect joint, as is often the case with the old style of mitre board. I am now offering these Machines to the trade at the following price :

Price, 3 1-2 Inch Iron.....$15.00.

The Langdon Adjustable Mitre Box.

Being made of Iron, will last for Years. Gives good satisfaction.

DIRECTIONS AND PRICES.

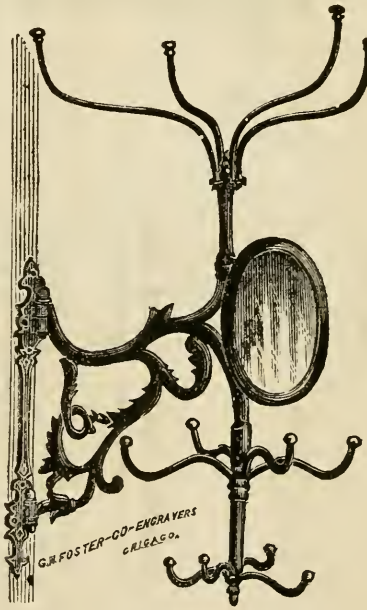
The Economical Hat and Coat Rack.



THEY ARE ECONOMICAL, first, as to cost. They are economical as to space, —being made to screw fast to a wall, window-frame or door-case,—and can, when out of use, be folded up against the wall so as to be entirely out of the way. When folded up it occupies about 3⅛ cubic feet. They are economical as to utility, combining in a most beautiful manner a separate hat and coat rack, —the upper portion being used exclusively for hats, and the lower for coats,— and capable of holding 16 coats: not spread all over a wall, but contained in a very small circle. They are economical as to durability, being made entirely of iron, excepting the mirror. They will stand the wear and tear for years, and answer all the purposes of a large hall rack.

Price ..... each, $1 35.

ON

CHILDREN'S CARRIAGES, ROCKING HORSES

Velocipedes, Carts, Wheelbarrows,

EXPRESS WAGONS AND CHAIR ROCKERS,

I have adopted the manufacturers' list prices, and from those prices I will allow a **DISCOUNT OF 15 PER CENT,** and would also wish to remind you of my terms in my introduction of **5 per cent discount for Cash,** upon receipt of goods, making my cash discount on the above **15 and 5 per cent.** You will please to observe that I have not advanced the manufacturers' list of prices on the above goods, which I could easily do, and give a greater discount; hence, you will perceive that in purchasing of me, you get these goods at figures which I am willing you should compare with any wholesale house in America that handle these same articles.

I find I shall not have space enough in these 96 pages to incorporate cuts and descriptions of Children's Carriages, Carts, Rocking Horses, Toy Goods, Walnut Brackets, &c., and I ask, as a favor to me, if consistent with your convenience, to reserve your orders on Children's Carriages, Express Wagons, Carts, Wheelbarrows, Chair Rockers, and Rocking Horses, until you have received my prices, which I should be pleased to forward to you with illustrations, upon receipt of your application.

The Patent Velocipede

Is made of the best malleable iron, and selected hickory wood, firmly riveted together. All the iron work, including a tasteful seat, being brightly tinned, give it a novel and striking appearance, which forcibly catches the eye of every beholder. It is one of the strongest and yet most elegant Velocipedes ever introduced—a perfect beauty. The axles are made of the best Swedish iron, wheels have tapered spokes and heavy, oval, welded tires.

Iron Velocipede.

In addition to the Patent Velocipede, three sizes of this combination are manufactured. With exception of wheels, the whole running gear is made of malleable iron and brightly tinned.

They are very showy and elegantly shaped, also cheaper in proportion to size, but will not compare in durability with the genuine patent styles referred to in this Catalogue.

Bicycle.

As shown by the above cut, the seat is placed almost directly over the centre of the front wheel, by which arrangement a much larger wheel can be ridden, thus gaining more speed by less power and easier movements.

Of the four sizes that are made, Nos. 1 and 2 are adapted for boys' use. All the iron parts are malleable and brightly tinned — connections of hickory wood, polished in rosewood finish. Nos. 3 and 4 are fully strong enough for men's use. The wheels are made of the best material, with hand-shared spokes, and heavy welded tires. The connections are made of iron tubing, well fitted, and finished in a superior manner.

Improved Star Velocipede.

In place of the Star Velocipede introduced in 1878, a similar machine is now substituted, constructed upon an entirely different principle, by which more speed is gained and easier movements, affording natural exercise, particularly for small children. The seat is placed between the two hind wheels, and the guide wheel in front can be turned so as to give free access.

All connections are made of malleable iron and brightly tinned, wheels are made of the best material, with heavy welded tires. Seat and wheels are painted in high colors.

Girls' New Patent Velocipede.

After repeated efforts, claimed by the manufacturer, have at last succeeded in producing a Velocipede that will commend itself at sight to all. It is constructed upon a very simple but effective principle, the motive power being derived from a combination of a lever and crank movement, which does away with the treadle motion, and allows the Velocipede to be propelled and guided at same time, giving an easy and graceful movement to the body and being conducive to health and strength.
